

New materials, processes and products dictate the need for continuous information. Magazine PlastForma has come out since 1996 and has among the subscribers a very good response. As similar foreign publications, PlastForma covers the following areas:

POLYMERS

- thermoplasts,
- duroplasts,
- rubber,
- adhesives,
- lacquers,
- additives,
- fibres for composites,
- technical ceramics.

MANUFACTURING TECHNOLOGIES

- injection moulding,
- extrusion,
- blow moulding,
- thermoforming,
- roto- in gravity moulding,
- foaming,
- film and part welding,
- reinforcing - composites.

TOOLS

- construction,
- materials for tools,
- production of prototypes in small-scale tools.

MARKET AND APPLICATION

- packaging
- plastics in automotive industry,
- polymers in construction, sport, medicine, ...
